

GROUNDWATER VULNERABILITY TWEED - BRUNSWICK CATCHMENTS

NOTE: Vulnerability maps are designed only as a guide and may not give a precise indication of any particular site. The maps are not intended to replace an environmental impact assessment. The preparation necessarily involves simplification of complex geological and hydrogeological situations.

This map should be used as a tool by planners, developers and regulating agencies to make better informed judgements on where to locate potentially polluting activities so as to minimise the risk to groundwater resources.

This map should be used in conjunction with the accompanying notes.

Further information can be obtained from
 Manager Hydrogeology
 Department of Land and Water Conservation
 PO Box 3720, Parramatta, NSW 2124.

Grid lines shown at 5000 metre intervals from False Origin of AMG Zone 56.

Produced by the Department of Land and Water Conservation Hydrogeology Unit, March 1997.
