

VULNERABILITY RATING

0-50	Low
50-85	Low moderate
85-120	Moderate
120-155	Moderately high
155-190	High

DRAFT

VICTORIA

NOTE- Vulnerability maps are designed only as a guide and may not give a precise indication at any particular site. The maps are not intended to replace an environmental impact assessment. The preparation necessarily involves simplification of complex geological and hydrogeological situations.

This map should be used as a tool by planners, developers and regulating agencies to make better informed judgements on where to locate potentially polluting activities so as to minimise the risk to groundwater resources.

This map should be used in conjunction with the accompanying notes.

GROUNDWATER VULNERABILITY MURRAY CATCHMENT

This map forms part of the New South Wales Groundwater Vulnerability Map Series.
Map compilation 2001; DLWC, Centre for Natural Resources; G.Piscopo, J.Dwyer; in consultation with DLWC Murray Region.

Further information can be obtained from Department of Land and Water Conservation, Murray Region, 8-20 Edwardes St, Deniliquin, NSW.

Lamberts Conformal Conic Projection.
Standard Parallels -34°30' and -37°00',
Central Meridian 146°00'.
